

Smart mobile energy for your fleet

Stealth Power mobile idle reduction solution provides full mobile power—without engine engagement—for vehicles with demanding electrical needs such as police, EMS, service, and utility vehicles. These smart-electric power systems offer energy to all onboard equipment while reducing idling.

MINIMIZE IDLING TIME

TRACK SYSTEM ANALYTICS

MANAGE REMOTELY

Reduce fuel and maintenance costs and harmful emissions.

Operate with any vehicle make or model and every fuel type.

Use predictive analytics to optimize performance.

It provides officers constant, never - ending power. They can power anything they want to power; they can jump - start anything they want to jump - start; they're never left stranded."

LT. DALE BARNARD, FLEET MANAGER,
DALLAS POLICE DEPARTMENT

POWER YOUR FLEET WITH SMARTER ENERGY, TODAY!

About Stealth Power

Stealth Power is the innovative leader in mobile power and idle-reduction technology. We develop and produce smart mobile power systems for fleets seeking mobile auxiliary power or idle-reduction solutions. Our solutions have prevented the release of thousands of tons of hazardous emissions into the atmosphere, and preserved millions of gallons of fuel for our client partners.
